## WHERE

Seden Centre for Child  
Development and Wellness  
182 Sioux Road, Sherwood Park,  
Alberta T8A 3X5  
[www.sedencentre.ca](http://www.sedencentre.ca)

2.8 – 4.8  
YEARS OLD

If your child is having trouble speaking and/or understanding language, it is important to have him/her assessed by a Speech Language Pathologist.

This developmental milestone can have a significant effect on your child's social/emotional growth and learning.

That is why it's so important to watch for signs in development, and to get help if you suspect problems. The sooner a child gets early intervention, the better their progress will be.

So, if you have concerns, act early and give us a call. We can help your child get the help he/she needs delivered their daycare.

**A child learns everything they need for life in the first 6 years  
... we make them count.**
